The Islamia University of Bahawalpur

Final Year Project Proposal

Program: ☐ BSSE ☒ BSIT ☐ BSAI

Project Title: Internera: AI-Integrated Virtual Internship & Career Acceleration System

Nature of Project: ☒ Development ☐ Research

Area of Specialization:

☐ Artificial Intelligence (AI)	☐ Game Development	☐ Internet of Things (IoT)
☐ Machine Learning	☐ Mobile App Development	☐ Blockchain
☐ Data Science and Analytics	☒ Web Development	☐ Cybersecurity
☐ Image Processing	☐ Desktop Application	
☐ Natural Language Processing (NLP)	☐ Other (Specify)_____	

Introduction:

Internera is a web-based platform designed to help students and fresh graduates gain practical experience, develop professional skills, and prepare for their future careers. The system provides virtual internship opportunities, task management, and skill development resources.

Its AI-powered features offer personalized career recommendations, CV analysis, skill-gap identification, and interview preparation support. Students can create profiles, apply for internships, complete assignments, receive feedback, and track their progress.

The main aim of this project is to bridge the gap between academic learning and industry requirements by combining virtual internships with artificial intelligence. It will help students identify suitable career paths, improve their employability, and become more confident and career-ready through practical learning and personalized AI-driven guidance.

Problem Statement:

Many students and fresh graduates complete their degrees without enough practical experience or career guidance. Physical internships are limited, difficult to access, and often unavailable to students in smaller cities. This creates the following problems:

1. **Gap between academic learning and industry needs.** Students learn theory but lack practical, job-ready skills that employers expect.
2. **Limited internship access.** Few internship seats are available, and many students cannot relocate or attend on-site internships.
3. **No personalized career guidance.** Students often do not know which career path suits their skills, and what skills they are missing.
4. **Weak CVs and poor interview preparation.** Students rarely receive feedback on their CVs or get a chance to practice interviews, which reduces their employability.

Internera addresses these shortcomings with one platform that combines virtual internships, task management, skill development resources and AI-driven guidance in the same place.

Project Goal / Objectives:

Goal: To develop an AI-integrated web platform that provides virtual internships and personalized career guidance, helping students bridge the gap between academic learning and industry requirements.

Objectives:

1. To allow students to create profiles, browse and apply for virtual internships.
2. To provide task management so students can complete assignments, receive feedback and track their progress.
3. To provide AI-powered career recommendations, CV analysis and skill-gap identification for each student.
4. To provide AI-based interview preparation support and skill development resources.
5. To build a responsive, user-friendly interface that works on both desktop and mobile browsers.
6. To improve students' employability and confidence through practical learning and personalized AI-driven guidance.

Application Architecture / Technology Stack / Tools / Hardware:

Language(s): HTML, CSS (Tailwind), JavaScript, TypeScript, Python

Framework / Libraries: React.js, Next.js, Framer Motion, shadcn/ui, LangChain (AI features)

Database: PostgreSQL (hosted on Supabase)

Architecture: Client–Server architecture: Next.js/React frontend, Supabase backend services (authentication, database, storage) and a Python/LangChain service for AI features

Tools: Visual Studio Code, Python 3, Node.js, Git, Google Chrome, draw.io (for diagrams)

Hardware: Core i5 processor, 8 GB RAM, internet connection

Project Group Members:

Sr.#	Reg. #	Student Name	Phone #	Signature
(1)	F23BINFT1M01013	Muhammad Hasnain	03097022601	

Project Supervisor:

Name: Mr. Wahaj Ali

Supervisor Acceptance Signature: _____

Head of Department (HoD): _____
